

“Simplifying Regulation for Agents and Brokers...”

## Members of Congress:

# Insurance Agents and Brokers Across all Lines of Insurance Support an Optional Federal Charter

If you hear from insurance agents and brokers who oppose an optional federal charter ask why they oppose competition in the marketplace. Ask why they oppose additional choice for consumers. Ask why they oppose an optional regulatory system with strong consumer protections. Ask why they oppose decreasing bureaucracy. Ask why they oppose open markets.

Ask why consumers deserve a  
**Trusted Choice** but not a **Real Choice**

All interested parties agree that agents and brokers struggle in today's regulatory environment with daunting licensing burdens and needless logistical and bureaucratic hurdles. The difference is Agents for Change supports a real solution: an optional federal charter.

An optional federal charter will promote open markets, choice, and competition which will ultimately benefit anybody who buys or sells an insurance product. Consumers ought to have a **Real Choice**.

Insurance agents and brokers want efficiency, certainty, and speed in the licensing and renewal process and their customers want additional products. What could be healthier for the marketplace than a system that protects policyholders, encourages competition, and enhances speed to market of products?

Support an optional federal charter to provide  
an **OPTIONAL** charter for carriers and an  
**OPTIONAL** licensing system for insurance  
agents and brokers
